1. Signing in and navigation

Open the application URL in your browser and sign in with your username and password. Your username is your organization employee code (a 4-digit number) unless you are an HR Administrator.

Sign-in page — a language switcher (EN / عربي) is available before and after login.

After signing in you land on the **Dashboard**, which shows organization-wide completion progress (visible to HR Administrators) or your own team's progress (for managers). The left-hand sidebar is your main navigation; it adapts to your role — an employee sees only **PM Form** and their own account controls, while a manager additionally sees their team, and an HR Administrator sees the full administrative menu.

LANGUAGE

Performance Management System — User Guide

Click **EN** / عربي in the top bar at any time. The entire interface — including PDF reports and emails — mirrors to right-to-left in Arabic. Your choice is remembered on your account.

2. Understanding the review workflow

Every annual performance review moves through a fixed sequence of stages. You will only ever be asked to act when the review reaches the stage that is yours:

STAGE	WHO ACTS	WHAT HAPPENS
KPI Creation	Manager	Manager sets KPIs (with weights) and competencies for the employee.
Employee Acknowledgement	Employee	Employee reviews and acknowledges the KPIs/competencies set for them.
Manager Review	Manager	At year-end, the manager scores actual achievement against each KPI/competency and submits to HR.
HR Review — First	HR	First HR reviewer checks and approves.
HR Review — Final	HR	A <i>different</i> HR reviewer gives final approval (the same person cannot perform both HR approvals).
Completed	—	Final score and rating are locked in; the employee and manager are notified.

You will receive an email at each stage that needs your action, with a button that takes you straight to the review (no separate login step). The same events also appear in your in-app Notifications (bell icon, top right).

3. For Managers: setting KPIs and competencies

Open **PM Form** from the sidebar and select the employee (searchable dropdown). If the review for the current year does not exist yet, you will see a blank form to fill in.

HR COMMENTS / REMARKS

PM Form — KPI Creation stage (Draft). The manager adds KPIs across four perspectives and sets weights.

1. Add KPIs under each applicable perspective — **Financial, Customer, Internal Process, Learning & Growth** — from the KPI Master list, and set a weight (%) for each. The suggested weight range for each KPI is shown as guidance.
2. Add competencies (behavioral and/or technical) from the Competency Master list, with weights.
3. The total KPI weight and total competency weight must each sum to **100%** before the form can be sent — the page shows a running total and flags it in red until it balances.
4. Click **Save Draft** at any point to save your progress without sending it anywhere.
5. When ready, click **Send to Employee**. This locks the KPI/competency structure and notifies the employee.

NOTE

The exact KPI/competency weight split (e.g. 60% KPI / 40% competency) is determined automatically by the employee's job family and grade — you do not set this split yourself.

4. For Employees: acknowledging and self-assessing

When your manager sends your KPIs, you'll receive an email and an in-app notification. Open the link (or navigate to **PM Form** yourself) to review what was set for you.

HR COMMENTS / REMARKS

PM Form — Employee Acknowledgement stage.

1. Review every KPI and competency and its assigned weight.
2. Add any comments in the Employee Comments field, if you wish.
3. Click **Acknowledge**. This is a formal confirmation that you have seen and understood what you are being measured against for the year — it does not require you to agree with a score yet, since no scores have been entered at this stage.

Later in the cycle, once the achievement-entry window opens (typically toward year-end), you may also be asked to provide a **self-assessment** and, where applicable, comments toward your own **development plan** — both are visible on the same PM Form page once that stage is reached.

5. For Managers: end-year scoring and submission

Once the achievement-entry window opens (an HR-configured date, typically after the employee has acknowledged), return to the employee's PM Form.

REVIEW DATE

REVIEWER SIGNATURE

HR COMMENTS / REMARKS

PM Form — Manager Review stage, entering achievement scores.

1. Enter an achievement score (0–100) for every KPI and competency.
2. The system calculates the weighted score for each item, and the overall KPI score, competency score, and combined performance score automatically as you enter values.
3. Complete the self-assessment/manager-comments fields as applicable, and optionally record a promotion recommendation (Yes / Borderline / No) with comments.
4. Click **Submit to HR**. All achievement scores must be entered (no zeros left unintentionally) before this button becomes available.

TIMING

"Submit to HR" only becomes available from the configured submission start date onward (an HR Administrator sets this under System Settings → Performance Review). Attempting to submit earlier shows a friendly message with the exact date it opens.

6. For HR Reviewers: two-stage approval

HR Administrators review submitted forms in two independent stages, enforced so the same reviewer cannot perform both:

1. **HR Review 1** — the first available HR reviewer opens the form (via **PM Form Summary** or a notification link), checks scores and comments, adds any HR remarks, and approves.
2. **HR Review 2 (Final)** — a *different* HR reviewer performs the final approval. Once approved, the review is **Completed**: the overall rating is finalized, the record is locked, and the employee and manager are notified by email.

If a submission needs correction, an HR reviewer can send it back to the manager (Return to Employee / Return to Manager) — see the Administrator Guide's Workflow Administration section for the full set of recovery actions available to HR Administrators specifically.

7. Reports

HR Administrators can generate four report types from the **Reports** page, each exportable as PDF or Excel:

Reports page — Employee, Department, Manager, and Overall Organization summaries.

REPORT	SHOWS
Employee Performance Report	Full record for one employee: scores, KPI/competency breakdown, comments, development plan, workflow history, and approval history.
Department Summary	All employees in one department for a review year, with scores, ratings, and completion status.
Manager Summary	A manager's direct reports for a review year, with scores, ratings, and completion.
Overall Organization Summary	Org-wide totals and a department-by-department breakdown for a review year.

Every export is generated fresh from the live database at the moment you click Export — reports are never cached or pre-computed, so they always reflect the current state.

PM Form Summary — filterable, paginated tracking grid.

Click **View** on any row to open that employee's PM Form directly.

9. Notifications

The bell icon in the top navigation bar shows your unread notification count. Notifications are created for every workflow event that concerns you — a review assigned to you, an acknowledgement received, a submission awaiting your review, a return-to-manager, a finalization — and can be marked read individually or all at once from the **Notifications** page.

10. Your account settings

From the top-right user menu you can change your password at any time (**Account** → **Change Password**). You will be required to change your password on first login and whenever your organization's password-expiry policy requires it — the system will route you there automatically when needed, preserving whatever page you were trying to reach so you land back on it after changing your password.
